

## KEY FEATURES

- **Weight:** 2.2 oz. (62 grams)
- **Display:** LED
  - Top two digits - Current Cant angle
  - Bottom two digits - Current Slope angle or current Cosine Correction Factor
- **User Interface:** Single button keypad
- **Operating Temperature Range:** -40°F to 140°F (-40°C to 60°C)
- **Altitude Range:** -1,600ft to 29,600ft (-300m to 9,000m)
- **Angular Ranges:** ±80° Slope (Look Angle) / ±90° CANT
- **Angular Resolution:** 0.1° (between -10° and 10°)
- **Battery Type:** CR-123
- **Battery Life:** 3 Years (based on average use case)

## Cant/Slope Indicator

The **RIANOV** CSI (Cant/Slope Indicator) officially being released at SHOT Show 2013.

For long-range precision shooters, Cant and Slope are two very important variables in making accurate shots.

The **RIANOV** CSI will replace both your Cant and Slope bubble levels with a state of the art digital unit capable of measuring Cant and Slope to a 10th of a degree. Digital read out eliminates the need for guessing or estimating on the actual value.

The Slope feature can be displayed as either Degrees or Cosine Correction Factor.
